

June's Charity of the Month: **Living Water International**

Proceeds from our **Lemon Truffle** will go to Living Water International

Chosen by **Megan Richardson!**

Megan has just recently come back to Red as our new front-of-house manager. She is a familiar face, as she was previously a barista at Red!

Living Water International began in 1990 when a group from Houston traveled to Kenya and saw the need for clean drinking water. Currently Living Water actively drills wells in communities which clean water has not previously been easily accessible. They also train and equip the local communities to implement clean water solutions where Living Water works.

Megan chose this organization because she has had personal experiences visiting communities around the world which lacked access to clean water. "Clean water is something we take for granted every day. Everything begins with water. It is the foundation for all other levels of development."
